Dear Artist,

Createx Colors continues to innovate, using up-to-the-minute technologies to achieve the highest possible performance in our water-based airbrush and custom paints.

Createx Colors is a Universe of Color. The continuity of our quality craftsmanship delivers water-based paint performance beyond expectations.

Please take a moment to review our catalog for new products and processes that continue to improve and impress.

Thank you,

**4008 Restorer**
- A biodegradable cleaner for removing cured paint from an airbrush, spray-gun and any surface.
- Use as a bath to soak metallic parts in. 4008 partially dissolves cured, water-based paint allowing for easy clean-up with soap and water.

**4011**
- A mild dilutant used for thinning paint viscosity. Compatible with all Createx paints.
- High Temperature - Use when painting over 80 degrees F (27 deg. C). Use of 4011 when temperatures are high is more suited to spray gun application. Compared to 4012, 4011 allows colors to flow longer for improved orientation of pearls & metallics and leveling after drying when painting in hot conditions.

**5618 Airbrush Cleaner**
A mild, water-based cleaner for rinsing colors from airbrush while painting.

**4012**
- Standard dilutant for thinning paint viscosity. Compatible with all Createx paints.
- Medium Temperature – Use for most applications, especially in temperatures between 60 – 80 degrees F (16 – 27 deg. C).

**4015 Cross-Linker**
- Activator for Scenix SSR Clears and Scenix Mural & Theme Paint. Compatible with all Createx paints.
- Adding 4015 to paint creates the highest level of cross-link density (full cure) improving the physical and chemical resistant properties of the final coating.

**4030 Balancing Clear**
A water-based, urethane resin. Mix with any Createx paint to create an acrylic-urethane mix.
- Improves flow and reduces tip-dry.
- Increases adhesion and mar resistance
- Reduces drying times.
- Also works as a durable, inter-coat clear. Dries to a satin, clear finish.

**4015 Cross-Linker**
- Activator for Scenix SSR Clears and Scenix Mural & Theme Paint. Compatible with all Createx paints.
- Adding 4015 to paint creates the highest level of cross-link density (full cure) improving the physical and chemical resistant properties of the final coating.

**4020**
- 4020 is a specialty dilutant that assists drying in humid conditions.
- Assists drying when painting in temperatures under 60 degrees F (16 deg. C).
- 4020 works best by mixing with 4012 to create a cocktailed dilutant.

The best Createx paint jobs start with AutoBorne Sealers.

- Absolute adhesion and durability direct to plastics, aluminum, fiberglass and more
- Self-leveling, high solids formula covers scuff marks and minor surface defects without revealing edges after curing
- Quick drying — faster than conventional solvent-based primers

Always Evolving!

- Advanced urethane and acrylic water-based resins for exceptional adhesion and abrasion resistance.
- Automotive-grade pigments and pearls for vibrant, lightfast colors.
Over 150 Inter-Mixable Colors

- A comprehensive line of metallic, pearl, candy and custom colors.
- Compatible with all Createx Colors paints.
- Durable and Versatile – hard enough for automotive yet flexible for costuming, vinyl and leather.

Auto Air Colors

TRUE CANDY PERFORMANCE.
Brilliant, transparent, aniline dyes.

candy₂₀ build to a darker value with successive coats and interact with metallics and pearls to create dynamic colors.

Water-Based Urethane Clears For Use With candy₂₀

4030 Balancing Clear
- Mix 4030 with candy₂₀.
- candy₂₀ are concentrated. Mixing with 4030 creates stable resin load.

4040 Bleed Checker
- Apply 4040 over candy₂₀ to “lock down” dyes.
- Stops candy₂₀’s dyes from bleeding into colors.
- Protects candy₂₀ from excess solvent before 2k clear top-coat.

Bloodline and Lifeline available sizes: 1 oz., 2 oz. & 8 oz.
"Tim Gore’s Bloodline and Lifeline paints by Createx are the perfect colors for the FX artist. These are my go-to colors for painting creatures, as well as to mimic human life-like skin. The best part is that these Createx colors match the make-up colors I regularly work with in my make-up FX kit for set work. I enjoy these paints so much for my projects at Kosart Studios, that I decided to switch to Tim Gore’s Bloodline and Lifeline paints when teaching my students how to paint their masks, props, and display sculptures at Kosart School for Entertainment Arts. They are a masterful line of paints."

~ J. Anthony Kosar

kosartschool.com
“When I airbrush tanks for the TV show, American Chopper, and want to utilize my Air, Oil and Lead Grey set for automotive applications, mixing 4030 Balancing Clear with my signature series Createx Illustration colors gives me the viscosity on par with many of the urethanes I cut my teeth on in the automotive industry. I not only trust it, but I trust in what I can do with it — and so do my clients.”

— Steve Gibson

1 oz. set [5015-01] & 2 oz. set [5015-02]

Createx Illustration Colors available sizes: 1 oz., 2 oz. & 8 oz.

“Using the Illustration Color Wheel Set, I started by mixing up some complimentary colours to get a muted dirty feel. Red Violet, Sepia, Burnt Umber are the base colours. Erasing techniques were used to build multiple layers of colour and texture. Towards the end of the work I heavily reduced colours to tint and wash areas helping melt the image together.”
— Paul Macdonald
Wicked Colors
Multi-surface: Automotive/Hard Surface, Leather, Tee Shirt

Transparent Colors with a high pigment load for superb coverage out-of-the-bottle. Wicked Colors also have a high resin load so colors may be generously over-reduced for transparency and atomization at low psi settings without losing line control.
**Wicked Colors**
Transparent colors with a high pigment content for excellent coverage out-of-the-bottle. Dry to a semi-gloss finish.

- 5508 Iridescent Fuchsia

### APPLICATION TIP:

“For washfast results on fabric, Createx Airbrush Colors and Wicked Colors must be heat-set after they air dry. Use a shirt-press for 20-25 seconds at 325°F; or with an iron set on high and a protective cloth over the paint until paint is warm to the touch.”

Water-Based Aliphatic Acrylic-Urethane
Industrial Grade Coating for Exterior & Interior Application.
ASTM E84 Class A Fire Rating for all Scenix Colors & Clears.

- Long-lasting industrial and exterior architectural paint system.
- Durability and adhesion that is better than any other architectural paint used for theme park, scenic and urethane plastic costume painting.
- Scenix SSR Clears are incredibly durable, chemically resistant and do not yellow.

A Universe of Color
Scenix SSR Clears
The Water-Based Revolution Continues!

SSR Clears are industrial grade clears made with a hybridized acrylic-urethane:

- Available in Gloss, Satin and Matte
- Exceptional adhesion. Our best plastic adhesion promoter.
- Non-caustic. Will not break-down other materials making them compatible with many substrates, composites and layering.
- ASTM E84 Class A Fire Rating

SSR stands for Sun Screen Resistant, meaning SSR clears will not re-emulsify when exposed to chemicals such as the solvents found in sunscreen. The result is a long lasting clear that doesn’t yellow or streak even in tough environments like hand-rails and customer reach areas.

- Compatible with all Createx paints

SSR Clears available sizes:
32 oz. & 128 oz.
